

SureAMID

HIGH PRESSURE
GAS PIPING SYSTEM
MADE FROM POLYAMIDE

Advantages & Properties

- Pipes & fittings made from polyamide
- SDR 11 in OD 110 mm and OD 160 mm
- Full pressure resistant up to 16 bar
- According to DVGW regulations
- Homogeneously weldable
- Installation without sandbed
- Made by AGRU + FRANK

SureAMID is a complete polyamide piping system consisting of pipes, fittings and the optimum joining technology. The high-grade polyamide plastic gives the system outstanding pressure and stress crack resistance as well as diffusion tightness.

This makes SureAMID your first choice for high-pressure gas applications up to 16 bar in accordance with DVGW bulletin G 472. The pipes and fittings can be joined using butt or electrofusion welding.

Last, not least the SureAMID piping system is designed for sandbed-free installation.
